## Visit us at the ISAG Open House

Discover the latest trends in imaging technology: Fujifilm partner and automation equipment manufacturer Imaging Solutions AG (ISAG) is hosting its first ever Open House – and we will be part of it.

The event, at Imaging Solutions headquarters in Regensdorf, Switzerland, from 25 February to 1 March, will focus on automation and improvements in production workflows for book and wall decor manufacturing.

In line with the event motto 'Get inspired by the new possibilities', it will feature new product releases and live demonstrations as well as roundtable discussions and symposiums with imaging-industry experts as keynote speakers. And of course it will offer excellent networking opportunities for professionals in industries like commercial printing, book manufacture, photo finishing and personalised gift fulfilment.

The ISAG Open House will coincide with the Hunkeler Innovationdays in nearby Lucerne from 25 to 28 February. A shuttle bus service between Hunkeler and ISAG headquarters will make it easy for visitors to attend both events.
