

For once in a lifetime memories

Fujifilm presents the glossy and lustre premium photo album paper based on silver halide technology: the Fujicolor Crystal Archive Album High Definition Paper.

This paper is specially designed as a professional and premium photo album product. It delivers enhanced colour reproduction, a wider colour range and an excellent image stability. It offers a higher resistance against all humidity conditions thanks to a protective layer. The outstanding fingerprint protection allows photos to be viewed with a brilliance as never before.

What you'll love about it: The story of your life is worth telling and this paper is the perfect stage. It reproduces your landscape, animal or nature photos as if you were there again. You can see, feel and almost touch the scene; your photos will look outstanding on this high-quality paper without sticking together. Preserve and relive the highlights of your life over and over again – in a premium, lay-flat photo album.
